

SECTION 20 DESIGN AIDS ON INTERNET (www.sdp-si.com)

With the availability and convenience of the Internet in the work place, it was only natural to switch from a CD-ROM publication to the Internet. All the contents of our previous CD-ROM have been converted and placed on our Web site. The following is a partial listing of programs that have been added to our Web site for your convenience.

1. **Product Navigator** (Database content manager of all products)
2. **Electronic pages of our catalog**
3. **Order Online** (Partial list of selected products via Thomas Register and our own order online capability under construction).
4. **Center Distance Designer**

Product information for all parts can be retrieved from the **content database** of our product line at <http://www.sdp-si.com/search3/>. Simply select the product group from the tree on the left, choose the specific product of interest, and select the different product attributers until a product is obtained. Alternatively, you can get to the content database by selecting the 2D/3D option from the left pane at the home page (<http://www.sdp-si.com/>).

The content database allows our customers to navigate our 60,000 line items until the item of interest is found. It gives the freedom to select the attributes that are of greatest interest to the user. It allows the users to view the catalog page for additional information via Adobe Acrobat Reader. Various flavors of CAD exchanges, of the products, can be retrieved from our Web site (proe, .dwg., iges, dxf, step., etc). We are continually improving and updating our database to bring new information and products to our customers in a timely manner.

A quick search option is available for customers who know the part number that they are looking for.

The electronic pages of our catalogs can be found at <http://www.sdp-si.com/catalogs.htm>. Alternatively, the user may select the link shown above the set of catalogs located at the top right of the home page labeled **FREE SDP/SI COMPONENTS CATALOGS**.

To find a product, first determine the catalog, then:

- Click on the link at the bottom right of the catalog.
- Select the chapter or product grouping at the bottom of the catalog icon.
- Click the product subgroup and navigate, if needed, to the product page of the Adobe document.

Order Online: This is an initial attempt to make available a selected group of products online through the Thomas Register order online system. To order online, the user must do one of the following:

- Click the link above the Thomas Register logo found in the upper left-hand corner of our front page (<http://www.sdp-si.com/>) which reads "ORDER ONLINE."
- Go to this Web address: <http://toorderonline.thomasregister.com>

Presently, approximately 2000 parts are available online. We are also in the process of developing our own order online capability.
